

Attitude Online Satlink Reasonable Use Policies

Attitude Online’s Reasonable Use Policy (RUP) has been designed to give our Subscriber(s) an above average surfing experience that far exceeds the typical subscriber(s) needs. Additionally, the RUP ensures that the Subscriber(s) all experience fair and equal access to the benefits of a satellite delivered broadband Internet access service. The RUP prevents the network from being congested by a handful of Subscriber(s) activities. However, Subscriber(s) that continually download large files, such as complete Operating Systems (e.g. Linux), will experience throughput limitations on a pro-rata basis over time until their average utilization returns to the levels expected from an individual residential user. The Attitude Online RUP will still allow for consumers of large amounts of bandwidth to complete their download of data. However, this type of Subscriber(s) will experience throughput speed reductions until such time that their usage conforms to average usage patterns of other Subscriber(s) within their same Attitude Online SatLink Services Plan.

Attitude Online reserves the right to adjust download limitations as required to ensure all users equal access to the provided high-speed download service and to make changes to the RUP as Attitude Online deems commercially necessary. The current RUP is based on cumulative usage over the previous five (5) day period. Usage tracking is currently based on the previous five (5) days cumulative total volume.
